

This is a conceptual rendering of the community vision for Mountain Way Common. It was developed based on community input made during a series of community steering committee and public Visioning meetings from September 2012 - May 2013. This rendering is NOT a detailed construction document or final implementation plan. Construction plans and documents, when developed, will go through standard engineering evaluations and permitting processes with the appropriate governing bodies and are subject to local and state codes regulating land use, building and watershed protection.

Legend
